# Novomatic Run500

The Run500 is ideal for all standard up&over doors as well as sectional doors up to a size of 9m<sup>2</sup> (14' x 7').

- Up&over doors up to a height of 2.4m (8')
- Sectional doors up to a height of 2.1m (7')

## Durability where it counts

with the very durable chain drive, rail and motor, combined with the 'tried & tested' 3 button programmable wall mounted control unit, which has a 7m connecting cable for ease of use and installation to a nearby power supply. This system offers both durability and quality rolled into one.

## Why choose the Run500?

- 500N push/pull force
- separate wall mounted high-tech control unit with 7m connecting cable to motor head for easy connection to power supply
- control unit featuring an integrated push-button
- clearly arranged 3-button control unit
- soft start/soft stop
- neat and compact in appearance
